Warranty and Service

JET warrants every product it sells against manufacturers' defects. If one of our tools needs service or repair, please contact Technical Service by calling 1-800-274-6846, 8AM to 5PM CST, Monday through Friday.

Warranty Period

The general warranty lasts for the time period specified in the literature included with your product or on the official JET branded website.

- JET products carry a limited warranty which varies in duration based upon the product. (See chart below)
- Accessories carry a limited warranty of one year from the date of receipt.
- Consumable items are defined as expendable parts or accessories expected to become inoperable within a reasonable amount of use and are covered by a 90 day limited warranty against manufacturer's defects.

Who is Covered

This warranty covers only the initial purchaser of the product from the date of delivery.

What is Covered

This warranty covers any defects in workmanship or materials subject to the limitations stated below. This warranty does not cover failures due directly or indirectly to misuse, abuse, negligence or accidents, normal wear-and-tear, improper repair, alterations or lack of maintenance. JET woodworking machinery is designed to be used with Wood. Use of these machines in the processing of metal, plastics, or other materials outside recommended guidelines may void the warranty. The exceptions are acrylics and other natural items that are made specifically for wood turning.

Warranty Limitations

Woodworking products with a Five Year Warranty that are used for commercial or industrial purposes default to a Two Year Warranty. Please contact Technical Service at 1-800-274-6846 for further clarification.

How to Get Technical Support

Please contact Technical Service by calling 1-800-274-6846. **Please note that you will be asked to provide proof of initial purchase when calling.** If a product requires further inspection, the Technical Service representative will explain and assist with any additional action needed. JET has Authorized Service Centers located throughout the United States. For the name of an Authorized Service Center in your area call 1-800-274-6846 or use the Service Center Locator on the JET website.

More Information

JET is constantly adding new products. For complete, up-to-date product information, check with your local distributor or visit the JET website.

How State Law Applies

This warranty gives you specific legal rights, subject to applicable state law.

Limitations on This Warranty

JET LIMITS ALL IMPLIED WARRANTIES TO THE PERIOD OF THE LIMITED WARRANTY FOR EACH PRODUCT. EXCEPT AS STATED HEREIN, ANY IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE EXCLUDED. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

JET SHALL IN NO EVENT BE LIABLE FOR DEATH, INJURIES TO PERSONS OR PROPERTY, OR FOR INCIDENTAL, CONTINGENT, SPECIAL, OR CONSEQUENTIAL DAMAGES ARISING FROM THE USE OF OUR PRODUCTS. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

JET sells through distributors only. The specifications listed in JET printed materials and on official JET website are given as general information and are not binding. JET reserves the right to effect at any time, without prior notice, those alterations to parts, fittings, and accessory equipment which they may deem necessary for any reason whatsoever. JET® branded products are not sold in Canada by JPW Industries, Inc.

Warnings

1. Read and understand the entire contents of this manual before attempting assembly or operation. Do not use this tool until proper training and knowledge have been obtained.
2. Keep guards in place and in working order.
3. Keep fingers and hands away from the spindle while in operation. Avoid getting fingers too close to the drum.
4. Remove adjusting keys and wrenches. Form habit of checking to see that keys and adjusting wrenches are removed before operating.
5. Keep work area clean. Cluttered areas and benches invite accidents.
6. Don't use in dangerous environment. Don't use power tools in damp or wet locations or expose them to rain.
7. Keep children and visitors away. All children and visitors should be kept a safe distance from work area.
8. Don't force tool. It will do the job better and be safer at the rate for which it was designed.
9. Use right tool. Don't force a tool or attachment to do a job for which it was not designed.
10. Wear proper apparel. No loose clothing, gloves, neckties, rings, bracelets, or other jewelry to get caught in moving parts. Nonslip footwear is recommended. Wear protective hair covering to contain long hair.
11. Wear safety glasses (must comply with ANSI Z87.1). Everyday eyeglasses only have impact resistant lenses; they are not safety glasses. Also use face or dust mask if cutting operation is dusty.
12. Don't overreach. Keep proper footing and balance at all times.
13. Turn the machine off and unplug from the power source before changing spindles.
14. Be sure the spindle drum is in good condition with no tears or holes before operating the sander.
15. Disconnect tools before servicing and when changing accessories such as blades, bits, cutters, etc.
16. Avoid accidental starting. Make sure switch is in "OFF" position before plugging in power cord.
17. Never stand on tool. Serious injury could occur if the tool is tipped or if the cutting tool is accidentally contacted.
18. Check damaged parts. Before further use of the tool, a guard or other part that is damaged should be carefully checked to ensure that it will operate properly and perform its intended function – check for alignment of moving parts, binding of moving parts, breakage of parts, mounting, and any other conditions that may affect its operation. A guard or other part that is damaged should be properly repaired or replaced.
19. Do not operate tool while under the influence of drugs, alcohol or any medication.
20. Shut off power before servicing or adjusting.
21. Never leave the tool running while unattended. Turn power off. Don't leave until the tool comes to a complete stop.
22. Do not operate this machine while tired or under the influence of drugs, alcohol or any medication.

Familiarize yourself with the following safety notices used in this manual:

CAUTION

This means that if precautions are not heeded, it may result in minor injury and/or machine damage.

WARNING

This means that if precautions are not heeded, it may result in serious or fatal injury.

Introduction

This manual covers the safe operation and maintenance procedures for a JET Model JBOS-5 Oscillating Spindle Sander. This manual contains instructions for installation, safety precautions, general operating procedures, maintenance, and a parts breakdown. This machine has been designed and constructed to provide consistent, long-term operation if used in accordance with the instructions set forth in this manual. If there are any questions or comments, please contact either your local supplier or JET. JET can also be reached at our website: www.jettools.com.

Retain this manual for future reference. If the machine transfers ownership, the manual should accompany it.

⚠ WARNING Read and understand the entire contents of this manual before attempting assembly or operation. Failure to comply may cause serious injury.

Specifications

Model Number.....	JBOS-5
Stock Number	708404
Table Size (in.)	14-1/2 x 14-1/2
Table Tilt (deg.)	0 to 45 down
Height, without spindle (in.)	18-3/4
Base Footprint (in.)	11-3/4 x 11-3/4
Spindle Speed (RPM)	1,725
Oscillations per Minute	30
Maximum Length of Oscillation (in.)	1
Oscillation Gear Environment	sealed oil bath
Provided sanding sleeves grit	100
Dust Port outside diameter (in.)	2
Power Cord length (ft.)	5-1/2
Motor (TEFC)	TEFC Induction, 1/2 HP, 1PH, 110V, 60Hz, 7.5A
Switch.....	manual, with removable safety key
Net Weight (lb)	77
Shipping Weight (lb)	82

The above specifications were current at the time this manual was published, but under our policy of continuous improvement, JET reserves the right to change specifications at any time and without prior notice, without incurring any obligations.

Unpacking and Setup

Contents of the Shipping Container

(see Figure 1)

- 1 Spindle Sander
- 1 Spindle Storage Plate (pre-installed)
- 1 Insert Storage Plate (pre-installed)
- 2 Round Opening Inserts (3/4" and 2")
- 2 Oblong Opening Inserts (3/4" and 2")
- 5 Sanding Spindles & Sleeves (all 100 Grit):
 - 1/4"x6"; 1/2"x6"; 5/8"x6";
 - 1-1/2"x5-1/2"; 2"x5-1/2"
- 1 Open End Wrench (10-12mm)
- 2 Open End Wrenches (14-17mm)
- 1 Operator's Manual
- 1 Warranty Card

Finish removing all contents from the shipping container and compare items with the list above. Contact your distributor or JET if any parts are missing. Do not discard any shipping material until the sander is set up and running properly.

Report damage, if any, to your local distributor and/or shipping company.

Exposed metal surfaces, including spindles, have been coated with a protectant. Clean these surfaces with a mild solvent or kerosene. Clean the spindles. Do **not** use lacquer thinner, paint thinner, or gasoline, as these will damage painted surfaces.

Periodically apply paste wax or other protectant to the table top to prevent rusting.

Spindle and Insert Storage Plates

See Figure 2.

Clean the insert plates and push the unused inserts into Storage Plate B. Place spindles in the opposite Storage Plate A.

Installing Spindles

- 1. Before inserting the threaded spindle into the spindle housing, make sure the surfaces are clean.
- 2. Thread the spindle counterclockwise into the spindle housing.
- 3. Using the provided wrenches, tighten the spindle nut (A, Figure 3) counterclockwise while holding the spindle housing flat (B, Figure 3) with the other wrench. NOTE: Do not over-tighten the spindle as it may be difficult to remove after the sanding operation.

Figure 1
Contents of Shipping Container

Figure 2

Figure 3

Insert Plates

1. Always use an insert plate.
2. There are 2 oblong, and 2 round insert plates included with the machine. The oblong insert plates are used when the table is tilted for bevel sanding. Each plate has a notch on the outer edge to ensure that it is inserted properly. (See page 9 to determine which insert plate to use with a particular spindle.)

Setup for 90°

1. Loosen both knobs, (A, Figure 4) and place the table in the 0° position.
2. Place a square (B, Figure 4) on the table. Rest the long section of the square against the sanding drum. The square should be flat against the table and the sanding drum.
3. If the table needs adjustment loosen both knobs and tilt the table so that the square is flat against the table and sanding drum.
4. Make sure the pointer (C, Figure 4) reads 0°. If the pointer needs adjusting loosen the screw (D, Figure 4), and adjust to the correct position.
5. Loosen lock nut (F, Figure 4), adjust the 90° stop bolt (E, Figure 4) with a 13mm open wrench so that it rests against the bottom side of the table, and re-tighten the lock nut (F, Figure 4) with a 12mm open wrench.

Figure 4

Setup for Bevel Sanding

1. Loosen both knobs (A, Figure 5) and adjust the table to the desired angle.
2. Tighten both knobs.

Dust Collection

The dust port (B, Figure 5) can be hooked directly to a 2" hose for dust collection.

See your local JET distributor for the complete line of dust collectors, as well as Hoses and Accessories. Customize your installation and obtain maximum performance with JET dust hoods, hoses, clamps, fittings, and blast gates.

Figure 5

Turning the Sander On & Off

Note: Before hooking the sander to the power source, make sure the switch is in off position.

The sander can be turned on by flipping the switch to the on position.

There is a removable key in the tip of the switch that can be removed in the off position. When the key has been removed the dust collector cannot be used.

Removing Spindles

Using the provided wrenches, loosen the spindle nut (A, Figure 6) clockwise while holding the spindle housing flat (B, Figure 6) with the other wrench.

Figure 6

Changing Sanding Sleeves

1/4", 1/2" and 5/8"

1. Loosen the clamp (A, Figure 7) with a cross point screwdriver.
2. Remove the sanding sleeve from the spindle shaft.
3. Install the new sleeve, making sure to re-tighten the clamp.

1-1/2" and 2" (optional 3")

1. Loosen the nut (B, Figure 7) with the provided wrench.
2. Remove the sanding sleeve from the spindle shaft.
3. Reverse these steps to install the new sanding sleeve.

Figure 7

Insert Plate Diameters

This will assist you in determining which spindle diameters will work in each insert plate.

6286979 (fits 1-1/2" and 2" spindles)

6286980 (fits 1-1/2" and 2" spindles)

6286981 (fits 1/4" to 1" spindles)

6286982 (fits 1/4" to 1" spindles)

6286984 (fits 3" spindles)

Replacement Parts

Replacement parts are listed on the following pages. To order parts or reach our service department, call 1-800-274-6848 Monday through Friday, 8:00 a.m. to 5:00 p.m. CST. Having the Model Number and Serial Number of your machine available when you call will allow us to serve you quickly and accurately.

Non-proprietary parts, such as fasteners, can be found at local hardware stores or may be ordered from JET. Some parts are shown for reference only and may not be available individually.
