

S-SERIES MATERIAL LIFTS

COMPACT POWER THAT KEEPS CREWS MOVING

OVERVIEW

Built for crews who need to move fast and work efficiently. Compact, easy to transport, and simple to store, it delivers reliable lifting performance with less effort and less downtime. Designed for everyday jobsite use, it gives contractors a smarter, safer way to handle materials and keep work moving.

IDEAL FOR

- HVAC Contractors
- Mechanical Contractors
- Facility Maintenance Teams
- Manufacturing Teams

THE JET ADVANTAGES

- **Superior Mobility and Transport:** The short stack mast design keeps the lift compact and easy to maneuver through tight job sites, doorways, and trucks. Patent pending leg manipulation allows fast nesting storage, while integrated forklift pockets provide a dedicated, safer way to load, unload, and transport the lift between jobs.
- **Performance That Keeps Crews Moving:** Lift up to 450 lbs. efficiently using a drill driven winch that increases speed while reducing operator fatigue. All metal pulley wheels, bearing mounted mast rollers, and debris guards are built to withstand daily use and keep the lift running smoothly in demanding environments.
- **Safety Built Into Every Lift:** Internal mast brakes provide additional safety, while the shorter mast height creates a safer size and weight for moving the lift around the job site and in and out of vehicles. Drill operated lifting improves control and reduces strain during frequent lifts.
- **Competitive Edge:** Designed for HVAC, mechanical, MRO, and manufacturing applications, the JET S-Series Material Lift delivers superior mobility, easy inspection and repair, and compact storage that competitors struggle to match. Backed by JET's trusted reputation, it is built to perform job after job with less downtime and more efficiency.

SERVICE & SUPPORT**

MODES OF OPERATION

STANDARD LIFT MODE

Short mast design delivers reliable, everyday lifting performance in a more compact, easier to handle package. The reduced mast height improves portability and mobility, making transport, setup, and storage simpler across job sites.

STOW MODE

Nesting Storage Mode features a compact folding leg design that allows the lift to store upright, maximizing valuable floor space when not in use. Ideal for shops, trailers, and off season storage.

FORKLIFT POCKETS

Pick, load, and move the lift effortlessly on and off the truck with the integrated forklift pockets. These pockets provide a safe and secure way to quickly move lifts without rigging above.

STOCK NO.	JT1-2597	JT1-2598
Model No.	JML-16S	JML-12S
Lift Height	16'	12'
Max. Load Rating 14" Load Center	450 lbs.	450 lbs.
Lift Height (Forks Up)	16' 8"	12' 11"
Lift Height (Forks Down)	15' 3"	11' 6"
Net Weight	300 lbs.	275 lbs.
Overall Dimensions (H x W x L)	63" x 61" x 55"	63" x 61" x 55"
Fork Dimensions (W x L)	19" x 23.5"	19" x 23.5"
Warranty	2 Year Limited	2 Year Limited

AVAILABLE ACCESSORIES	STOCK NO.	MODEL NO.	DETAILS
Fork Extension Kit	JT1-3013	JML-FES	Steel supports quickly pin into place. Outside fit. Extends reach to 30".
Adjustable Pipe Cradle Kit	JT1-2596	JML-APC	Unique adjustable design, lays flat when not in use, tool-free design.

DRILL DRIVE WINCH

Eliminates fatigue and improves safety.

DEBRIS GUARDS

Prevents bolts and screws from entering mast sections.

MAST LOCK

Spring and Pin design improves security during transit.

LEG LATCHES

Quick and easy to use, allowing for easy operation.

CRANE EYE

Easily pick up with crane or hoist as needed.
